

2008 Take Our Children to Work Day

“Making Choices for a Better World”

My Day at NASA Marshall Space Flight Center

What was the best part of this day for you, and why?

Was anything different than you expected it to be? If so, what?

Now that you've spent a day with your parent/guardian what do you think about their work?

If you were to work at NASA someday, what type of job would you want to have and why?
